

We help organisations accelerate their performance using our expertise and leading technology

Catalyst implements **back-office business technology** and **reporting solutions** to an expansive customer base, from start-ups to FTSE 100 companies, and across many different industries.

What difference would a technology solution from Catalyst make to your business?

Streamline your operations

ERP enables you to gain an advantage by managing all your business processes seamlessly and from one integrated system, to include financials, ecommerce and CRM.

Improve your decision making

BI gives you the power to effortlessly create reports and achieve accurate insight in real-time, right across your business.

Our solutions help customers' to run their businesses more effectively by enabling them to manage and accelerate their performance. Whether seeking a **single integrated technology platform** to manage all their key business functions or a **reporting capability** to uncover the hidden story in their data, our customers benefit from the Catalyst culture and core values:

- Ensuring a positive customer experience and providing Speed to Value
- A strong team culture and excellent work ethic
- Consistent project focus and a commitment to delivering desired business outcomes

Typically, customers contact us to overcome the following business challenges:

- The need for a **single business platform** to integrate financials, sales and operations information
- Keen to move away from legacy systems that no longer do the job and cannot easily be customised
- Investment in a **reporting capability** which brings together disparate data sources and encourages collaboration across departments
- Using technology to improve the productivity of the finance team, sales team or operations team
- A **back-office system requirement** to support high growth and achieve targets
- An e-commerce requirement to support a multichannel business model, which may also need global capabilities
- Desiring **greater efficiency and improved business performance**

Our solutions to these challenges centre around Enterprise Resource Planning (ERP) and Business Intelligence (BI).

Catalyst is aligned to specific best of breed vendors, NetSuite for Enterprise Resource Planning (ERP) and Qlik for Business Intelligence (BI).

Catalyst has successfully completed over 450 projects with customers just like you.
